Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4,9-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1,4,9,10,13,14 stand rejected for use of the terminology "alkali oxide". This term is not considered the equivalent of the term "alkali metal oxide" which defines a specific grouping of elements. The instant disclosure does not define the term "alkali oxide" which sufficient specificity as to allow one of ordinary skill in the art to determine the meets and bounds of the claims. Applicants argue that page 8 of the disclosure defines the term "alkali oxide". This is not persuasive in overcoming the rejection because page 8 of the disclosure defines "alkali content" which appears to include alkaline earth metal oxides in addition to alkali metal oxides. Page 8, line 7 defines alkali metal oxides. Claims 2,3 and 11 are included in the rejection because the term "alkali oxide" is not defined in the disclosure and the definition of "alkali content" includes MgO and CaO.

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
